

Takeflite Maintenance

Online Aircraft Maintenance software designed to meet the needs of airlines in Australasia, the Pacific and Middle East. Perfect for aircraft ranging from Cessna 182 to Jetstream 41

Aircraft Utilization

- Flight logs
- Keep accurate running totals
- Pilots can enter flight logs themselves

Manage

- Components
- Inspections
- ADs / SBs
- Defects
- Inventory
- Purchase Orders

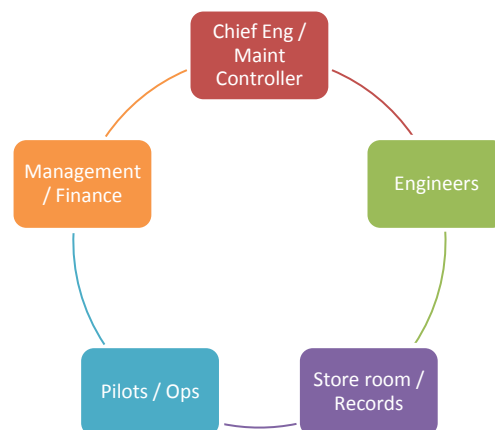

Plan

- Find coming up, overdue items
- Forecast (long term planning)
- Roster staff
- Schedule Work

Track in Jobs

- Inventory used
- Labour
- Costs
- Generate Work Packs
- Invoice to MYOB

- Access your data from any Windows PC with an internet connection, anywhere in the world
- Bring your organization together by eliminating silos of information (i.e. spreadsheets, Access databases) and paper-based processes

- Control access to data with user permission levels. Also track changes made by users
- Enter [flight logs](#) and have all the data automatically update the totals for your aircraft
- Log [Trend Monitoring](#) data against your aircraft

- Easily enter and manage scheduled and unscheduled aircraft maintenance items:
 - [Components, Inspections](#)
 - [Airworthiness Directives, Service Bulletins](#)
 - [Defects](#)
- Know what is [coming up and overdue](#) the moment you login – be it expired parts, an AD that is overdue or parts that need re-ordering
- Quickly apply new ADs, SBs, etc to your fleet
- Easily [find what is due soon](#) (i.e. next 200 hours)
- [Forecast](#) far into the future based on prior flying history or assumptions you define
- Manage your [inventory](#) stores. Can handle multiple locations
- Use [barcodes](#) to simplify the booking out of parts

- [Purchase Order](#) system to manage incoming parts and generate quote/part request forms
- Use the [Stocktake](#) system to simplify the process of performing a stock-take, updating records and accounting for discrepancies
- [Jobs](#) track all aspect of work:
 - Labour (time, costs)
 - Inventory used
 - Work completed
 - Other costs such as sub-contractors, freight
- Generate Work Packs
- Invoice Jobs to MYOB
- [Roster staff](#) and enter scheduled work into the [Task Planner](#)
- Manage the calibration of your tools
- Allow engineers to [login using a barcode](#) on their ID card
- If you perform regular maintenance for 3rd parties, provide access so they can view the status of their aircraft and enter flight logs
- Modern, easy-to-use interface
- Use the advanced reports to do everything from determine how much you've spent by supplier to the distribution of defects by ATA chapter
- Reports can be exported to PDF or Excel
- Rest easy knowing your data is managed in a world class data centre. Physical security, backups, server management, etc is all taken care of
- [Automatically receive program updates](#), so you and your team are always up to date
- Integrate with [Takeflite Ops Manager](#)
